Not-ify

Introduction

Not-ify offers a simple interface for you to log into your account, play and search for your favorite songs, and build your own playlists. This guide serves to help you navigate the interface.

Accessing your account

You can create a new account by selecting *register* button, just provide a user name and password then click *Login.*

Already have an account? Simply enter your credentials and click the *Login* button to start your musical journey.

Playing a song

Play songs by clicking the *Play* button next to the song you would like to play. If you want to stop the song just click the *Stop* button in the left side-bar above the *Exit* button.

Searching for a song by name or by artist

To search for a song by artist or by song title click on the *search* button and a new window will appear where users can enter the song title or by artist to list all of that artists songs.

Add songs to a playlist

You can add a song to a playlist by searching for it and clicking the *Add* button nect to any song. Just select which playlist you want to add it to and start building the ultimate playlist!

Create a new playlist

Build your own playlists by searching for a song and clicking the *New Playlist* button on the left side-bar which adds the playlist to your account. Give it any name you like and start adding songs to it!

Delete a playlist

Delete a playlist by selecting the *Del Playlist* button and the playlist will be removed from your account.

Display a playlist

To display a playlist simply click on the playlist name in the left side-bar and the songs contained on that list will be displayed for you.

Compile list of random songs

Looking for something new to listen to? You can retrieve a list of 15 randomly selected songs by clicking the *Rand 15* button.

Exit Not-ify

We hate to see you leave but you can exit *Not-ify* on either the login screen or the player window, just click the *Exit* button.
